

(C) WDF/GHOST

The Alderaan Royal Engineering Thixian 7 was a light transport designed to function as a larger space transport with versatility and customization. Often used in planetary defense fleets, as well as sector patrols and as customs craft, the Thixian 7 saw limited success and use in the Core Worlds, with more widespread presence in Mid and Outer Rim territories. Unfortunately, it quickly moved from cutting-edge technology to a common free-trader ship, as newer designs by Sienar Fleet Systems, Kuat Drive Yards, and especially Corellian Engineering Corporation moved to the forefront. It is now only found in extremely rare cases, being a venerable design made by a shipyard that is literally no longer in existence, and only used by the very economically conscious. As such, any Thixian 7 still in service has 1d3 starship flaws.

### Alderaan Royal Engineering Thixian 7

<b>Class:</b> Space Transport	<b>Crew:</b> 1 (Normal +2)
<b>Size:</b> Small (37.2 m long)	<b>Initiative:</b> +3 (+1 size, +2 Crew)
<b>Hyperdrive:</b> x2 (backup x8)	<b>Manuever:</b> +3 (+1 size, +2 Crew)
<b>Passengers:</b> 4	<b>Defense:</b> 21 (+1 size, +10 armor)
<b>Cargo Capacity:</b> 20 metric tons	<b>Shield Points:</b> 30
<b>Consumables:</b> 1 month	<b>Hull Points:</b> 120 (DR 10)
<b>Cost:</b> 19,000 (used only; original new price 96,500)	<b>Construction Points:</b> 49
<b>Maximum Speed in Space:</b> Cruising (3 squares/action) (M: Average)	
<b>Atmospheric Speed:</b> 6 squares/action	
<b>Weapon:</b> Light Laser Cannon; <b>Fire Arc:</b> Turret; <b>Atack Bonus:</b> +8 (+1 size, +2 crew, +4 fire control); <b>Damage:</b> 3d10x2; <b>Range Modifiers:</b> PB +8; S +6; M/ L n/a.
